MEMORANDUM

Date: MAY 01 1990

Subject: Review of Surface Water/Wetland Concerns for the Draft Remedial Investigation (RI) Report, Medley Farms NPL Site, Gaffney, South Carolina

From: Sharon Berry *SB*  
Wetlands Planning Unit

To: Jon K. Bornholm, RPM  
Waste Management Division

Thru: *Margaret Vanderhoogt*  
Gail M. Vanderhoogt, Chief  
Wetlands Planning Unit

The above-referenced report has been reviewed per your April 2, 1990 request. Our major concern focuses on the possible impact to area surface water and sediments, (i.e. Jones Creek). Since figure 3.4 denoting all surface water and sediment sampling locations was not included in the report, evaluation for the most representative sampling location could not be performed. However, analytical data show no detection of residual chemicals in the surface water or sediments. Based on this finding, our concerns have been adequately addressed as presented in the report.

If you have additional questions, please contact me at x2126.
